Professional Summary

Java Full Stack Developer with hands-on experience in Java, Spring Boot, RESTful APIs, Spring Security, React.js, MySQL, and MongoDB. Experienced in secure backend services, role-based authentication, database-driven applications, and AI-integrated solutions. Familiar with AWS, Docker, CI/CD, and software testing, with a strong foundation in DSA, OOP, DBMS, and 300+ DSA problems solved.

Education

KIET Group of Institutions — *Ghaziabad, UP*
B.Tech in Information Technology (AKTU) — *2023 – 2026*

Government Polytechnic — *Bahraich, UP*
Diploma in Electrical Engineering — *2020 – 2023*

Experience

MetaUpSpace — *Ghaziabad, UP*
Java Full Stack Developer Intern — *Mar 2026 – May 2026*

- Developed a secure **Spring Boot backend** integrated with a responsive React.js frontend for a full-stack Job Portal featuring **Role-Based Access Control (RBAC)**.
- Developed **10+ RESTful APIs** and React.js UI components using Tailwind CSS for recruiter KYC, job posting, application tracking, and candidate shortlisting workflows.
- Designed MongoDB schemas, implemented **JWT-based authentication**, and performed unit testing using **JUnit** with API testing in **Postman**.

Projects

Smart Email Assistant using Gemini AI — *Oct 2025 – Nov 2025*
Technologies: *Java, Spring Boot, React.js, Tailwind CSS, REST APIs, Google Gemini API, Axios*

- Developed a **Spring Boot microservice** integrated with Google Gemini AI for contextual email analysis and automated response generation.
- Built a responsive React.js frontend with a dynamic rich-text editor for email input, response generation, and reply-tone customization.
- Implemented a **Controller-Service-DTO** architecture and Axios-based API communication to maintain backend/frontend separation of concerns.

Hotel Management System — *Nov 2024 – Dec 2024*
Technologies: *HTML5, CSS3, JavaScript (ES6+), MySQL, JDBC*

- Developed a web application with an interactive booking dashboard using HTML5, CSS3, and JavaScript for room filtering, booking, and billing.
- Implemented dynamic DOM manipulation and asynchronous **Fetch API** calls to retrieve room status and process guest workflows without full-page reloads.
- Integrated a **MySQL database using JDBC** for persistent transaction storage and real-time room availability management.

Technical Skills

- **Languages:** Java, SQL, Python, JavaScript
- **Backend:** Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, JWT, Hibernate/JPA, JDBC
- **Frontend & Web:** React.js, HTML5, CSS3, Tailwind CSS
- **Databases & Caching:** MySQL, PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS (EC2, S3, RDS, IAM, CloudWatch), Docker, CI/CD Pipelines, Git, GitHub
- **Testing & Code Quality:** JUnit, Postman, SonarQube, Maven
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems
- **Software Engineering:** SDLC, Agile/Scrum, Software Testing

Certifications

- **AWS Certified Developer – Associate** – AWS Academy — Apr 2026
- **AWS Certified Cloud Practitioner** – AWS Academy — Jan 2026
- **Oracle Cloud Infrastructure AI Foundations Associate** – Oracle — Aug 2025
- **Data Structures and Algorithms in Java** – Infosys Springboard — Apr 2025

Achievements & Research

- Solved **300+ DSA problems** on LeetCode and HackerRank, covering core data structures and algorithms.
- Co-authored the research paper *"Cross-Lingual Sentiment Detection on Social Media Using Transformer-Based Architectures"*, presented at **ETMIS 2025** (Springer / Scopus Indexed).
